Dear Partners,

We refer to you on behalf of the Ministry of Agrarian Policy and Food of Ukraine, who entitled Ukrainian Agri Council together with Association of Milk Producers and Association of Pig Breeders to negotiate and organize the supply of crucial imports for the needs of Ukrainian livestock.

On February 24, Russia has launched a full-scale war against Ukraine at the very heart of Europe. Most cities and countryside are under missile attacks and Russian troops shell the residential area and civilians. Although Ukraine resists greatly, the country and its people have faced huge humanitarian and food threats.

Ukrainian agriculture suffers greatly, as it's high time for sowing campaign. But instead, farmers have to defend their homes. The farmers run short of diesel, seeds, fertilizers, crop protection products. The failure of sowing campaign in Ukraine will become a trigger for global food crisis and famine in the poor countries.

Most regions of Ukraine are hotspots, where the intensive warfare takes place. The logistics and supply chain around the country are broken. As a result, dairy and cattle farmers, pig breeders have faced extreme shortage of veterinarian medicines and instruments, feeds, milking equipment spares. Their stocks are insufficient that lead to decreasing livestock and humanitarian catastrophe for population of Ukraine in the upcoming weeks.

Today, Ukrainian Agri Council together with its members have joined forces to ensure the food security in Ukraine. Though the logistic doesn't work well in the country, we've arranged several hubs, where we receive and re-select food, medicine, basic commodities and veterinarian. We have well-organized logistics and all permits to deliver humanitarian cargo around the country.

For this, we call our partners for action! We are kindly asking you to support our associations and help Ukrainian agriculture, mainly cattle farming to survive. We made need list of food, veterinarian, feed and humanitarian aid attached to this letter. We believe you will join forces and resources to provide feasible aid to Ukraine.

Highly appreciate your contribution to defense of Ukraine and its one of the strong points – agriculture.

Contact persons for any issues on veterinarian and humanitarian aid:
